

## SFC dry baths

State-of-the-art peltier dry baths: the instruments in our PDB series are the most precise, quiet and energy-efficient. They are operated using a colored touchscreen that provides clearly arranged status information and self-explanatory guidance.

The dry-baths are available with 1, 4 or 6 temperature zones and can be upgraded with an automatic calibration and an inert gas cover to avoid condensation at low temperatures. All models are ready for use in our automation systems.

### Specifications

- -10 °C to +100°C
- 18 positions per zone
- Approx. 50 watt per zone
- 80 to 250 volt AC
- color touch display
- Complies with official AOCS requirements for IUPSC Cd 16b-93
